**Table S1** Quality control performance check with the metals concentration (mg/kg) in certified reference material MAG-1 and DORM-4 on dry weight basis.

MAG-1 = Marine sediment certified reference material for trace metal, DORM-4 = Fish protein certified reference material for trace metal. Abbreviation: SPM = suspended particulate matter. Values are presented as an average (n = 3).

**Table S2a** Pearson correlation coefficient (r value) between metals concentration in surface sediment, SPM, surface seawater (dissolved), oyster tissue and physico-chemical parameters at Chicalim Bay (CB) during April 2013 – May 2014.
